DETAILED ACTION

1. This office action is in response to the amendment filed on 3/16/06.

Claims 1-21 are presented for examination.

2. The text of those applicable section of Title 35, U.S. Code not included in this action can be found in the prior Office Action.

Claim Objections

3. Claims 6-8 and 15-17 are objected to because of the following informalities:

In claims 6-8, line 1, "a system" should be --the system--.

In claims 15-17, line 1, "a network" should be --the network--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8, 17 and 19 contain the trademark/trade name "*Virtual Interface (VI) Architecture Specification*" and "*Next Generation Input/Output (NGIO) Specification*". Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a

Art Unit: 2115

source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe "data channels formed via a switched fabric" and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 21 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 21 is not limited to tangible embodiments. In view of Applicant's disclosure, specification page 15, lines 10-16, the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments and intangible embodiments such as internet, signals, carrier wave, waveforms, transmissions and communication link which are non-statutory subject matter. As such, the claim is not limited to statutory subject matter and is therefore non-statutory.
